Among the above mentioned models; the 2012 model was reported to be the worst of all the Buick Regal models on the market. Also according to an article published on car complaint; Buick at the moment has assured its users that any of its SUVs with faults will be replaced. Also is a midsize four door ruggedizing wagon called the Regal TourX. This condition arises when there is a damaged Rotor disk or driving through the mud or water, this could eventually lead to brakes failure. We spend our time collecting up some of the rarest owner manuals around in an attempt to make them as easily findable as possible. That is you transmission oil hole. Make sure you use GM product rather than a Ford product. Make sure u open your owners manual in the glove box and it tells you how to read the wand. Do not overfill it See the attached picture. Hope this helps When I shut the car off the starter still tries to engage and turns over and over at a fast rate. Sometimes when the car is off and the key is out it does the same thing. I replaced the ignition switch and had the started checked out both good. Also I replaced the starter relay, still no luck. Now when I turn my car off I have to pop the hood and pull my crank relay so the car will stay off. I checked some of my grounds to see if that would help but no luck. Just not sure where it is still getting power when the car is off and key is out. Thanks Please refer to CarGurus Terms of Use. could only imagine. I have drove this car for about 80,000 miles from Florida to virginia and everywhere in between. It has been thru mud, snow, hurricanes, you name it.<http://dacselectrosystems.com/images/canon-digital-rebel-xt-350d-manual.xml>

Value Performance Quality Comfort Reliability Styling 4 0 Was this review helpful. Lost its paint back in 2009 due to a factory error This car is super reliable. She has 168,000 on her and still strong, I see this car maybe reaching 200,000 before I have to think of replacing her. Value Performance Quality Comfort Reliability Styling 1 0 Was this review helpful. The model was originally positioned as a personal luxury car, and typically offered in both coupe and sedan forms until 1997, when the Regal became sedanonly due to the decline of the personal luxury coupe market. For certain model years between 1973 and 2004, the Regal shared bodies and powertrains with the similar Buick Century, although the Regal was positioned as a more upmarket vehicle. In 2008, a new version of the Regal was introduced for the Chinese market, which is a badge engineered version of the Opel Insignia. The new Regal was introduced to the North American market in 2011, positioned as a midsize vehicle. At the same time, Oldsmobile added a formal notchback coupe to its intermediate line, the Cutlass Supreme, in 1970 and that model soon became Olds best selling intermediate. In a curious name swap, the Skylark name was dropped from Buicks intermediate line and instead the Century nameplate, last used in the 1950s, was revived for them. Like its corporate cousins, the Regal and Luxus featured the newly fashionable opera windows, which were small fixed rear side windows surrounded by sheet metal, instead of the traditional rolldown windows. The Regal coupe sold reasonably well, although it lagged behind the Monte Carlo and Cutlass Supreme which had become the bestselling cars in America by 1976. For 1975 and 1976, the Century and Regal were the only mid sized cars in America to offer V6 engines. Initially, a threespeed manual transmission was standard but this was later replaced by an automatic. It was the first time the name appeared on a full model lineup.

The base model was equipped with soft riding luxury suspension, and did not offer a manual transmission in later years. Turbo versions were offered with either a two or a four barrel carburetor. The Buick LeSabre was also available with the turbocharged engine. The only other turbocharged cars available in the U.S. market in 1978 were imports from Mercedes Benz, Porsche and Saab. The Regal Sport Coupe also included a firm handling suspension with larger tires and sport wheels. Bucket seats and a center console with a Tshifter were also available. The sloping hood and nose of the car made it the favorite of several NASCAR teams. Richard Petty drove one to victory in the 1981 Daytona 500, and the car won a majority of the 1981 and 1982 seasons races and won the NASCAR manufacturers title in 1981 and 1982. From 1986 to 1987, the 307 cu in 5.0 L V8 was available as an option. The 3,791 cc 3.8 L; 231.3 cu in 2 bbl V6 was standard. The 2004R overdrive transmission was an option with either engine. The interior had tan and blue plush velour upholstery, brushed chrome trim, and additional Somerset badging. A Somerset Limited Edition model was also offered on the restyled 1981 Regal. It had unique dark sandstone and camel exterior paint, sport mirrors, and turbine wheels. The interior plush velour upholstery was camel with dark brown piping. All started out as charcoal gray Regals that were shipped off to a subcontractor for finishing. Most obvious was the light silver gray firemist paint added to each side. The wheel opening moldings and rocker panel moldings were blacked out using black vinyl tape. Finally, a front air dam and rear spoiler were installed. These seats are fully adjustable and were covered with silver brandon cloth with black vinyl inserts. Of the 215 Regal Grand Nationals produced in 1982, at least 35 were based on the Buick Regal Sport coupe package with the turbocharged 3,791 cc 3.8 L; 231.

<https://labroclub.ru/blog/3pk-nt007-manual>

3 cu in V6 engine with 175 hp 177 PS; 130 kW at 4000 rpm and 275 lbft 373 Nm of torque at 2600 rpm. There were only 2022 Sport coupes produced in 1982, and the number of cars with both the GN and Sport coupe packages is estimated to be fewer than 50. The Sport coupe model was renamed

the TType; 3,732 were produced 190 hp 193 PS; 142 kW at 1600 rpm and 280 lbft 380 Nm of torque at 2400 rpm. The TType had been used on other Buicks, starting with the Riviera in 1981 in 1979 and 1980, it was the S Type. The turbocharged 3,791 cc 3.8 L; 231.3 cu in became standard and was refined with sequential fuel injection, distributor less computer controlled ignition, and boasted 200 hp 203 PS; 149 kW at 4400 rpm and 300 lbft 407 Nm of torque at 2400 rpm. Only 5,204 turbo Regals were produced that year, only 2,000 of which were Grand Nationals. Because this was the first year production of the computer controlled sequential fuel injection and distributorless ignition, this is often considered the year and model that started the development of the legendary intercooled Grand Nationals. An estimated 200 of the 1984 Grand Nationals were produced with the TTop option which makes these the rarest of the Grand Nationals. The Grand Nationals quantity 5,512 and TTypes quantity 2,384 were both produced in 1986. There were only 7,896 turbo Regals produced in 1986. Only 1,547 of this variant were produced. The differences between a WE4 and the Grand National were the interior trim package, wheels, exterior badging, aluminum bumper supports, and aluminum rear drum brakes as opposed to the Grand Nationals cast iron, making the WE4 a lighter and faster car. The rear spoiler was only available as a dealer installed option. 1987 was the only year that the LC2 turbo option was available on any Regal, making it possible to even see a Limited with a vinyl landau roof and a power bulge turbo hood.

<http://www.federicocastelnovo.com/images/briggs-u0026-stratton-service-and-repair-manual.pdf>

Turbo Regal Limiteds were one of the rarest models of turbo Regals produced second only to the GNX at 1,035 turbo Limiteds. Limiteds were treated to a very luxurious interior with plush carpeting and optional bench pillow seats and a column shift. The GNX used a unique torque arm that was mounted to a special, GNX only, rear differential cover, for increased traction. The torque arm rear suspension alters the suspension geometry, making the body lift while planting the rear tires down, resulting in increased traction. Though the new Regal returned to Buicks original concept in being offered only as a coupe and in being aimed once again squarely at the personal luxury buyer, it departed from tradition in being the first frontwheel drive model, and in having no serious performance option or edition. Neither a V8 engine nor a turbocharged V6 was offered; the only engine available for 1988 was the Chevrolet 2.8 L V6, producing 125 hp 93 kW. For 1989, the Gran Sport trim line was added, featuring aluminum wheels, body side cladding and a console mounted shifter attached to the 4speed automatic. For 1990, the Regal gained the option of the Buick 3.8 L V6. The 3800 V6 was unique to the Regal, differentiating it from the mechanically similar Chevrolet Lumina, Oldsmobile Cutlass Supreme and Pontiac Grand Prix. Antilock brakes were made standard on all but the base Custom cars from 1992, and the grille was redesigned again for 1993. Along with the new look came an electronically controlled automatic transmission and LeSabre like rear lights and bumper. For 1993, a drivers side airbag was added, along with standard ABS on all models, standard power windows, and 20 hp 15 kW more in the base engine due to a revised intake manifold and cylinder head. The Limited coupe was deleted; only the Custom and Gran Sport GS coupes remained. Dual airbags were new for 1995 along with a new interior.

<http://ferienwohnung-dorsten.com/images/briggs-u0026-stratton-rototiller-manual.pdf>

As the upmarket version, the Regal offered larger engines and fancier trim, and once again boasted a newer version of the 3.8 L V6. While the Century was mainly a reliable, economyminded car based upon the Wbody, the Regal was fitted with many amenities, including heated leather seats optional on the Century, a Monsoon 8speaker surround sound system, dual climate control, and expansive interior space. Few changes occurred during this versions sevenyear run. It offered 5passenger seating on all trim levels like the Pontiac Grand Prix and Oldsmobile Intrigue formerly Cutlass Supreme, unlike their predecessors that had optional 6passenger seating and the Buick Century formerly built on the A platform which had standard 6passenger seating. The LSE stayed with the 200 hp 149 kW engine with upgrades and the GSE stayed with the 240 hp 179 kW supercharged

engine with upgrades. Also, in 2000 Buick came out with a concept GSX that had an intercooled 3.8 L, but was supercharged rather than turbocharged. It had 295.24 hp 220.16 kW They offered dealer installed options and dealer supplied accessories for both LS and GS models. Like the GS Buicks that came before it, the SLP GSX came in three power train packages, referred to as stages. The Stage 1 package added 10 horsepower with the addition of a dual stainless steel catback exhaust system and freeflowing cold air induction system. If you opted for the Stage 2 package, a Hypertech Power Programmer with an SLP custom calibration tune was included with the Stage 1 components — good for an extra 20 horsepower. The range topping Stage 3 package added a 3.5 inch smaller diameter supercharger pulley to crank up the boost. With an advertised 30 more horsepower than stock, the Stage 3 GSX was conservatively rated at 270 hp 201 kW and 312 lbft 423 Nm of torque.

Since the parts were available from SLP over the counter for many years, there have been quite a few Regal GS sedans that have been cloned into a GSX for both appearance and performance purposes. Though the model didn't officially debut until 2003, a licensed SLP dealer could perform the transformation on any Regal GS from 1997 to 2004. The Chinese market Regal has different front and rear styling compared to the North American version and different engines, including the 2.0 L L34, the 2.5 L LB8 V6 and the 3.0 L LW9 V6. Gearbox choices were a 4 speed automatic for V6 models, while four cylinder variants are paired with a 5 speed manual gearbox. V6 models had a set of black dashboard gauges, while the four cylinder models had white dashboard gauges. These models also had slightly different names the entry level model was the New Century, with more upscale models carrying the GL and GLX names. Later, G and GS models were added. Production for this generation ended in November 2008 in China being replaced the Opel Insignia based Regal. The concept featured a 2.0L, 270 hp 201 kW, 295 lbft 400 Nm high output DOHC I4 turbocharged Ecotec engine, a 6 speed manual transmission and all wheel drive. The GS features Buicks Interactive Drive Control System with GS mode, a choice of an FGP Germany F406 six speed manual or Aisin AF40 G2 six speed automatic transmission, high performance brakes with Brembo front calipers and high performance strut HiPerStrut front suspension. 19 inch wheels will be standard and 20 inch forged aluminum wheels will be available. This car has been localized. The output of the 2.0L Turbo SIDI engine is 162 kW 217 hp, which is about 40 kW 54 hp less than the production US model. The car is only offered in this case as a front wheel drive. The eAssist system is standard in the LaCrosse 2.5 L I4, but the eAssist powertrain is optional in the Regal. The eAssist system adds up to 15 hp 11 kW to the standard 2.4L Ecotec engine during acceleration.

The six speed manual transmission is still offered, but only in the front wheel drive variant. Buicks VentiPorts have reappeared starting with 2014 models, a styling feature unique to Buick that dates back to 1949. While the roofline is similar to that of its predecessor, the new liftback configuration provides added utility. This generation of GS sports a 3.6 liter LGX V6 engine producing 310 hp. These vehicles are equipped with two turn signal bulbs in each front turn signal. GMs number for this recall is 12212.

In the affected vehicles, the bolt that secures the drivers and passengers power front seat height adjuster may fall out causing the seat to drop suddenly to the lowest vertical position. The manufacturer distributed interim letters to owners on September 11, 2014. GMs number for this recall is 14271. Also, certain 2013 Buick Encore, 2011 Buick Regal, 20132014 Buick Verano, 20112016 Chevrolet Cruze, 20102013 Chevrolet Equinox 20132015 Chevrolet Malibu, and 20112013 GMC Terrain vehicles may have been serviced with similar defective replacement electronic park lock levers. The recall began on October 14, 2016. Owners may contact Chevrolet customer service at 18002221020, Buick 18005217300, and GMC 18004628782. GMs number for this recall is 50490 and 50491. The power seat wiring harness may contact the seat frame, causing the wires to chafe. The recall began on March 13, 2017. GMs number for this recall is 30710. Also, certain 2013 Buick Encore, 2011 Buick Regal, 20132014 Buick Verano, 20112016 Chevrolet Cruze, 20102013 Chevrolet Equinox 20132015 Chevrolet Malibu, and 20112013 GMC Terrain vehicles may

have been serviced with similar defective replacement electronic park lock levers. The recall began on October 14, 2016. GMs number for this recall is 30710. On May 18, 2015, GM expanded the recall to cover an additional 49,751 2004 Pontiac Grand Prix vehicles manufactured January 6, 2003, to June 25, 2004. In the affected vehicles, the valve cover gasket may leak. These repairs will be done free of charge. The recall began on April 24, 2015. Owners may contact Buick customer service at 18005217300, Pontiac customer service at 18007622737 or Chevrolet customer service at 18002221020. GMs number for this recall is 14574. The affected vehicles were previously repaired under recalls 08V118, 09V116, and 15V201 to address the possibility that engine oil may drip onto the hot exhaust manifold. Under the improved remedy, dealers will replace the engines front valve cover and gasket.

Vehicles that are covered by recalls 08V118, 09V116, or 15V201 that have not yet received the original remedy will instead receive the improved remedy under the original recall number. The recall began on February 19, 2016. Owners may contact Chevrolet customer service at 18002221020, Buick customer service at 18005217300, Oldsmobile customer service at 18004426537 and Pontiac customer service at 18004588006. GMs number for this recall is 15757. Note Until the improved remedy has been applied, owners are advised to park their vehicle outside since the fire risk exists even when the vehicle is unattended. The affected vehicles were previously repaired under recalls 08V118, 09V116, and 15V201 to address the possibility that engine oil may drip onto the hot exhaust manifold. Under the improved remedy, dealers will replace the engines front valve cover and gasket.
